About me

Hey there! I'm Hólmar, and I hail from the beautiful city of Reykjavík, Iceland. With a relaxed disposition and a laid-back personality, I tend to go with the flow and enjoy the simple pleasures of life. I've always had a soft spot for humor, especially the kind that tickles the funny bone and leaves you in stitches. Whether it's a witty quip or a well-timed joke, I believe laughter is the best medicine.

Skill

Tech Stack:

- HTML
- CSS
- JavaScript
- React Native
- React
- Nodejs
- Python
- C#

interests

Interests: I'm passionate about maintaining a balanced lifestyle, which includes regular workouts, diving into programming projects, occasional computer gaming sessions, and finding solace in the peaceful art of fishing.

education

- 2018-2021 B.Sc. Reykjavík university
Majoring in Computer Science
- 2017-2018 High school, Reykjavík university
High school degree from Reykjavík university (ice. Háskólabrú)

experience

- 2021-2022 MySoccerSkills IOS mobile app
Designed and developed a mobile training app, specifically tailored for soccer players, which is currently accessible on the App Store. As the sole developer, I utilized React Native as the primary framework, complemented by the Native Base component library for streamlined UI development. With a strong emphasis on gamification, the app integrates multiple features to enhance user engagement and training experiences. Leveraging Google Firebase for the backend infrastructure ensures seamless data management, contributing to a robust and efficient user experience.
